

## The benefits of an eco-house

- less polluting;
  - conserve natural resources;
  - new jobs associated with the development of the areas;
  - reduce energy consumption;
  - improve and smarten our daily life
- In general protection of the environment.

The human factor is the key to energy efficiency

We need people with knowledge and ecological awareness to have the best results for the environment and of course for *our pocket*.

# ECO-HOUSE

## The disadvantages of an eco-house

- it's an expensive construction;
- it requires a quite large area of land;
- you need specialized materials which are hard to find.

The *smart house* in other words requires active citizens.

We can have a better world with an eye to the past and a foot in the future.
