

What is Flora and Fauna?

- Flora means the nature with its plant life of any particular region or time
- Fauna means the animal life of any particular region or time

The Earth is full of beautiful animals and plants which take place in nature.

Global Warming

- The average temperature of the earth is increased
- It is primary caused by increasing concentrations of greenhouse gases

Other dangers for nature

- Pollution, water pollution
- Human hunting
- Forest fires
- Overfishing

COMENIUS

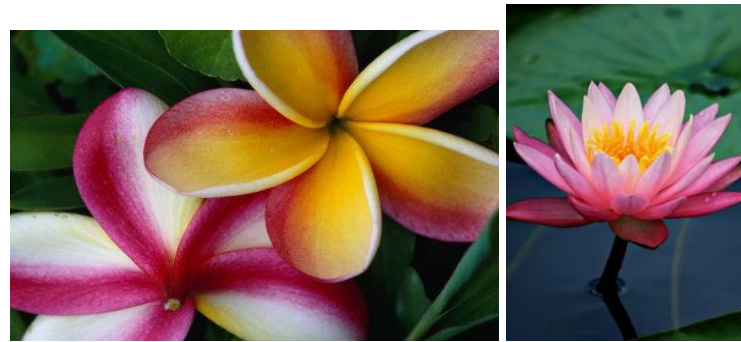

What we can do to save our planet?

- Make laws against hunting and other dangers for nature
- Build animal crossings and silencing screens
- Reduce water pollution
- Control fishing and CO2 emissions
- Save the rainforests

Needs of plants

- Oxygen
- Natural habitat, Forest for growing
- Water
- Light

Needs of animals

- Oxygen
- Shelter
- Water and food
- Light
- Safety for their children
- Good natural relationships

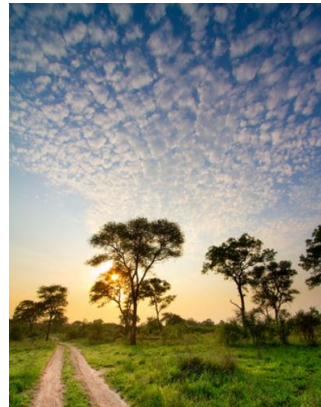

FLORA & FAUNA

“When the last tree is cut down, the last fish eaten, and the last stream poisoned, you will realize that you cannot eat money”

-Native American wisdom

Major insights

- Flora and fauna on earth is very sensitive and therefore we must be careful that we do not have a negative impact on it.
- We need to act sustainably.
- It is important to always be aware of how we influence our environment.
- You should keep in mind that you are living in a beautiful world which your children or grandchildren want to live in, too.
